T-45 HOP PELLETS

What Are T-45 Hop Pellets?

Type 45 hop pellets are also known as “concentrated hop pellets” or “lupulin-enriched hop pellets.” They are sold under various brand names.

T-45 pellets contain a higher concentration of the aromatic oils and bittering resins from whole hop cones, while the proportion of polyphenols and other vegetative matters is reduced.

How T-45 Hop Pellets Are Made

Benefits of T-45 Hop Pellets

Cost Savings

Increased Beer Yield

Decreased Wort Losses

Bigger Hop Punch

Lower Logistics Cost

HOP SOLUTIONS

T-45 HOP PELLETS

How to Brew with T-45 Pellets

T-45 Hop Pellets can be used anywhere T-90 pellets would be incorporated, but are ideal for aroma and whirlpool additions, as well as dry hopping during or after fermentation.

Due to the higher concentration of acids and oils in T-45 pellets, hop charges in many recipes can be reduced by approximately 50% vs. T-90 pellets or whole hop cones. We recommend conducting trials to determine the optimal T-45 usage rate for your formulation.

Available Varieties:

German Amarillo® T-45: Tropical Punch, Stone Fruit, Citrus

Comet T-45: Lime, Lemon, Vanilla

El Dorado® T-45: Tropical, Watermelon, Stone Fruit

Hallertau Blanc T-45: Passion Fruit, Tropical, Lemongrass

Huell Melon T-45: Melon, Strawberry, Tropical

Mandarina Bavaria T-45: Citrus, Lime, Tropical

Triumph T-45: Peach, Citrus, Pine
