

# Strata®

**Breeding/Development:** An Indie Hops variety. Born in 2009, Strata is the progeny of an open-pollinated Perle located at an Oregon State University experimental field in Corvallis, Oregon. Strong disease resistance, a vigorous growth habit, and hypnotic layers of flavor have launched Strata into the top echelon of craft IPA hops.

**Brewing Application:** Ideal for aroma and finishing additions, Strata performs well in an ensemble and shines bright solo. Fruit-forward and dank in Pale Ales, West Coasts, and Hazy IPAs, Strata contributes a clean and refreshing profile in traditional German beers such as Helles, Pils, and Kolsch.

**Sensory:** Bright notes of fresh strawberry, passionfruit, and melon give way to layers of ruby red grapefruit, cannabis, and dried chili pepper. Dry hopping cranks up the dank and tropical aromas.

## SENSORY HIGHLIGHTS

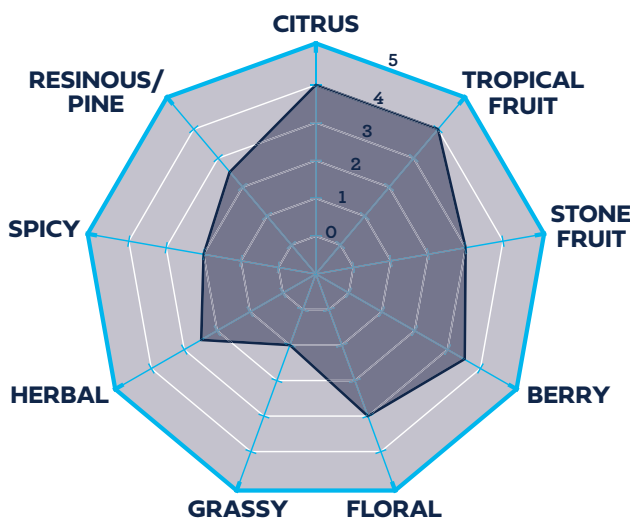

**Berry  
Passionfruit  
Grapefruit**

## BREWING VALUES

|                            |            |
|----------------------------|------------|
| Alpha Acid Range:          | 12 - 15%   |
| Beta Acid Range:           | 5.0 - 6.0% |
| Co-Humulone as % of Alpha: | 21         |
| Total oils mL/100 gr.:     | 2.3 - 3.5  |

## OIL FRACTIONS

|                |           |
|----------------|-----------|
| Myrcene:       | 52 - 65%  |
| Humulene:      | 22 - 30%  |
| Caryophyllene: | 5 - 12.5% |
| Farnesene:     | <1%       |
